The attached report represents a consolidation of Reports of Condition and Income filed by state-chartered banks with the Missouri Division of Finance as of March 31, 2018, and a comparison with the statements filed one year earlier. Also included is a comparison of financial statements of state-chartered and national banks.

During the previous twelve months, the number of state-chartered banks and trust companies reduced from 249 to 244. During these past twelve months six banks merged into other institutions and one new state bank charter was granted as a national institution converted to state chartered bank.

Assets in state-chartered banks totaled \$130 billion on March 31, 2018, an increase of 5.0 percent from one year earlier. Deposits were \$109.7 billion and total loans were \$85.5 billion on March 31, 2018, an increase of 5.6 and 7.9 percent respectively, from one year earlier.

The overall condition of Missouri state-chartered banks continues to improve. The attached graphs illustrate improvement in several component areas. Asset quality has improved, with the past due ratio manageable at 1.49 percent. The return on assets remains strong at 1.16 percent, despite a compressed net interest margin.

Capital remains strong and slightly above the national average, as the Tier 1 Leverage Capital ratio is 9.72 percent of total assets.
