Richard J. Weaver
Commissioner of Finance

September 14, 2012

The attached report represents a consolidation of Reports of Condition and Income filed by state-chartered banks with the Missouri Division of Finance as of June 30, 2012, and a comparison with the statements filed one year earlier. Also included is a comparison of financial statements of state-chartered and national banks.

During the previous twelve months, the number of state-chartered banks and trust companies decreased by one from 281 to 280. Two banks merged into other institutions. One state-chartered bank closed in the period. Two new bank charters were granted when national institutions converted to state-chartered banks.

Assets in state-chartered banks totaled \$94.4 billion on June 30, 2012, an increase of 3.4 percent from one year earlier. Deposits were \$78.7 billion, up 4.1 percent. Total loans were \$54.4 billion on June 30, 2012, down 1.0 percent.

Indicators of continued improvement in the overall condition of state-chartered banks are illustrated in the attached graphs. Evidence of asset quality improvement includes the continued decline in the past due loan ratio: 3.03 percent as compared to 4.08 percent a year ago and 5.0 percent at the end of 2010. This ratio also compares favorably to that of all FDIC insured commercial banks (5.04 percent as of June 30, 2012). Earnings performance continues to improve. At 1.02 percent, the return on assets approximates the return on assets of 0.99 percent for all FDIC insured commercial banks. The June 30, 2012, return on assets for Missouri state-chartered banks surpassed one percent for the first time since 2007. Capital levels remain strong, exceeding national averages. Missouri state-chartered banks had a loan to asset ratio of 57.6 percent as of the end of the second quarter. This compares to 53.0 percent for all FDIC insured commercial banks in the country.

While real improvement in state-chartered banks' condition is noted, the remnants of the economic downturn remain evident in these Reports. As graphically depicted on the next page, the level of foreclosed real estate in relation to total assets remains historically high. Also improving, but still high, is the volume of loan losses in relation to total loans.

A handwritten signature in cursive script that reads "Richard J. Weaver".
